Adamello Park

Adamello Park lies in the heart of Alpi Retiche. It covers about 510 square km on the left side of Valle Camonica, in the north-eastern section of the Province of Brescia. Along the several trails crossing the Park (among the others, the famous Trail no. 1), you will have the opportunity to admire the spectacular alpine landscape. There are also other several and charming itineraries for less demanding hikes, tours on horseback or by mountain bike, in some of the most beautiful valleys of the protected area. The natural environment of Adamello Park is characterized by rich flora and vegetation, in particular by the presence of rare and endemic species, and by its typically alpine wildlife (roe deer, deer, chamois, ibex, etc.).
